RE: Permit Application Concerning Expansion of the Crandall Canyon Mine,
Carbon County, Utah (U-54762)

In Reply Please Refer to Case No. J885

Dear Mr. Schueneman:

The Utah State Historic Preservation Office received your letter on the above referenced project on April 24, 1989. We previously consulted with the Forest Service and the Division of Oil, Gas, and Mining on this project and concurred that there were no known historic properties that would be impacted by this project. A 10% survey of the areas most likely to contain archaeological and historic resources was conducted and the remaining areas were found not likely to contain cultural resources.

We agree with your recommendation for the potential discovery of previously unknown cultural resources in that your office, the Division of Oil, Gas, and Mining, and our office will be notified. The discovered site will be protected, evaluated and mitigation measures instigated, if necessary.

We also agree with your recommendation that no known historic properties will be impacted by the project. This information is provided on request to assist the Office of Surface Mining with its Section 106 responsibilities as specified in 36 CFR 800. If you have questions or need additional assistance, please contact me at (801) 533-7039.

Sincerely,

Diana Christensen
Regulation Assistance Coordinator
